PROJECTS

Marvel-heroes

HTML, CSS, JavaScript, API integration, Git, GitHub

[Source Code](#)

- Developed responsive webapp for browsing Marvel heroes using front-end technologies (**HTML, CSS, JavaScript**).
- Integrated API for fetching and displaying hero information**, with the ability to add and remove favorites.

Todo – React - App

React.js, Axios, JSON Placeholder API, REST API.

[Source Code](#)

- Developed a Todo application using React.js and Axios.

- Integrated the **JSON Placeholder API** to create a fake REST API for demonstration purposes.
- Built a responsive user interface that allows users to add, view, cross off completed, and delete todos.

Node - Js Authentication

Express JS, MongoDB, Node-Mailer, Redis, HTML, CSS, Node JS.

[Source Code](#)

- A Node.js server-side app for all authentication and authorization related task.
- It contains both manual and Google oAuth2 login/signup features

YouTube-Clone-App -

React.js, Axios , API Integration , Tailwinds CSS.

[Source Code](#)

- Developed a YouTube Clone application using React.js and Axios.
- Integrated the Rapid API to retrieve videos from the API based on search queries and categories.
- Built a responsive user interface that allows users to enjoy online videos in the same way as on YouTube.

CERTIFICATION

Data Structure and Algorithm in Java

Frontend Full Stack Development

Backend Full Stack Development

React Full Stack development

ACHIEVEMENTS

- Solved **500+**successful Problems on Leetcode , Coding Ninjas and Geeksforgeeks.
- Achieved **78.33%** in TCS NQT Programming.
